DETAILED ACTION

Drawings

1. Figures 8-9 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: the reference to particular claims in the description, i.e. on pages 4-13, should be deleted as not pertaining to a description of the invention.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The recitation "the sealing and bonding agent" in lines 6-7 is without proper antecedent basis.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by De Lucchi. Note col. 2, lines 51-56 where the outer peripheral surfaces 11A and 11B of both side parts of the elastic packing 9 are adhesively bonded to the inner peripheral surfaces of the cylindrical roll members 2 of De Lucchi. The elastic packing 9 of De Lucchi forms one concave portion as recited in claim 3. The intermediate part 11 of each of the pleat-like portions of the packing of De Lucchi is smaller in width as recited in claim 4 and the bottom of the concave portion is arcuate as recited in claim 5. The adhesive used in the bonding process of the packing of De Lucchi is inherently liquid tight as would most adhesives be in sealing installations, re claim 6.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over De Lucchi. The inclusion of a groove in the outer peripheral surface of the pleat-like portions 11 of De Lucchi would have been an obvious design consideration to one of ordinary skill in the art since it is old

Art Unit: 3654

and well known in many arts using adhesive as a bonding agent that a groove to accommodate the adhesive between bonded parts would have facilitated attachment of those parts.

Allowable Subject Matter

9. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rajaniemi, Munsche et al and Demiere are cited to show other segmented shaft mechanisms.
